## Personal Details

**Full Name:** Valentinos Papasavvas **DOB:** 11/05/1986  
**Email:** [vpapasavvas@gmail.com](mailto:vpapasavvas@gmail.com) **Nationality:** Cypriot  
**Personal website:** <http://www.papasavvas.me>  
**GitHub account:** <https://github.com/poupouxios>  
**Driving Licence:** Yes

## Personal Profile

I am sociable, energetic and friendly person. My interpersonal skills make me a good communicator, able to work well with others. I motivate and encourage people around me. I am self-aware and always seek to learn and grow. I am not scared of undertaking new responsibilities no matter the degree of difficulty. I am a critical thinker and a good researcher.

Currently in my role, I've had the privilege of leading cross-functional teams of engineers, devops and developers in the design, implementation, and optimization of these innovative solutions. By empowering our teams with the resources, support, and autonomy they need, we've cultivated an environment where creativity flourishes, and groundbreaking ideas come to life. My primary focus has been on fostering a culture of collaboration and empowerment, where our talented teams are inspired to push the boundaries of what's possible.

One of our key achievements has been the development of scalable, resilient, and performant systems that form the backbone of our telecommunications solutions. Central to this success is our strategic utilization of RabbitMQ as a message broker, containerization for autoscaling enabling seamless communication and data exchange across our platform. Furthermore, our adoption of microservices architecture has revolutionized the way we design and deploy software, allowing us to build modular, independent services that can scale effortlessly to meet the demands of our growing customer base.

## Employment

### Head of Engineering at Intergo Telecom Ltd, Cyprus

09/2021 – Current

**THE ROLE:** Leading cross-functional teams of engineers, devops, and developers in the design, implementation, and optimization of these innovative solutions. By empowering our teams with the resources, support, and autonomy they need, we've cultivated an environment where creativity flourishes, and groundbreaking ideas come to life. I've had the privilege of spearheading our company's remarkable growth journey since 2021, with a strong emphasis on empowering teams to drive technological innovation along with unlocking core features of our products. Managed to shape the company from a small startup to be today's FT-1000 Europe's fastest-growing company (one of the 2 in Cyprus <https://www.ft.com/ft1000-2024>) and be part of Deloitte's Technology Fast 50 award (<https://www2.deloitte.com/xe/en/pages/deloitte-private/articles/fast-50-3rd-edition-results.html>)

#### RESPONSIBILITIES:

- Allocate resources, manage expectations and performance, and drive team efficiencies
- Manage the use of technology stacks and ensures that team members grow their knowledge base, by utilizing Online courses and additional professional development
- Participate in the hiring and part of management decision makers
- Work with other business units to analyze trends and product needs for continues product improvement
- Enhance engineering efficiency by closely observing the team and identify opportunities
- Provide mentorship and technical guidance to teammates
- Own development projects from conception through build, testing, implementation and support ensuring they meet business needs.
- Identifying bottlenecks on the systems and try and find the cause through various APM tools
- Manage QA resources to ensure through testing of all code before release. Utilising automated testing where possible.

# Valentinos Papasavvas
